2	Development informations	3
3	Changelog	5
3.1	1.3	5
3.2	1.2	5
3.3	1.1	5
3.4	1.0	5

Brain wolfram

1.1 Purpose

The *wolfram* brain is a gateway to query Wolfram Alpha <https://www.wolframalpha.com/> from Domogik.

1.2 Dependencies

The following dependencies are needed :

- `textblob` (`>=0.11.0`) : this is needed to translate the queries and the answers.
- `Tungsten` (`==0.1.1`) : this is needed to interact with Wolfram Alpha.

To install them, just do :

```
pip install textblob
pip install tungsten
```

1.3 Brain configuration

You need to set a Wolfram Alpha Key. You can grab it by registering on the Wolfram Alpha website.

Be careful, the key may take a few hours to be activated.

Key	Type	Description
<code>api_key</code>	string	To get a Wolfram Alpha API key, you need to register (freely) on https://developer.wolframalpha.com/portal/signin.html
